

Quick Install Guide for EM6561 Rotating Internet Camera and EM6564 Outdoor Internet Camera

This quick installation guide will help you to add an e-Domotica IP camera to the e-Domotica e-Centre Base Station.

1. Logging in to your e-Centre

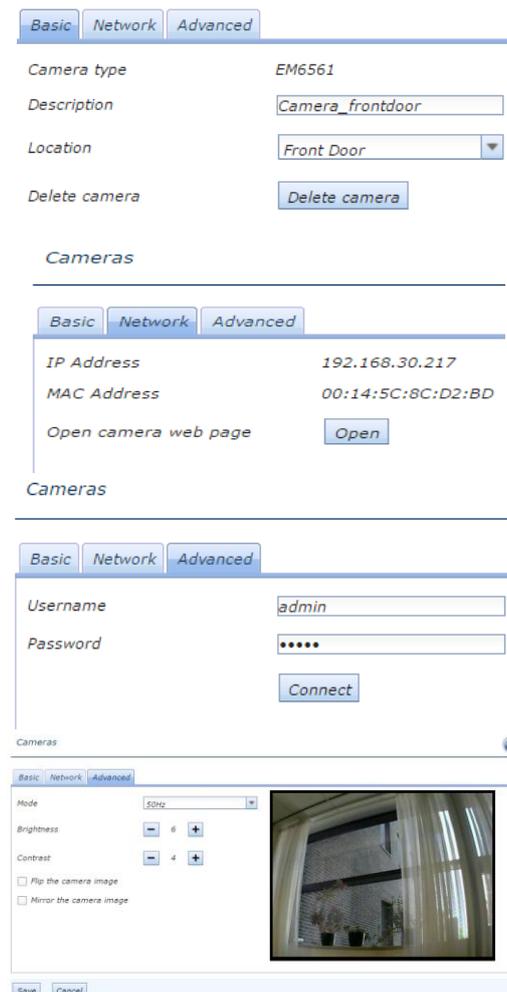

- Start your computer or notebook.
- Open a browser, for example Chrome or Firefox.
- Open the e-Centre webpage via <http://ecentre>. Or go to the IP address of the e-Centre, for example <http://192.168.1.100>.
- Log in with the standard PIN code 1234, or use your own PIN code.

2. Add a new camera to your e-Centre

- Go to 'Cameras'.
- At the bottom click on 'Add...'
- Follow the steps in the wizard.
- The camera is now added to your e-Centre. You can view the camera on your e-Centre screen at 'cameras' or using the free of charge e-Domotica app.

3. Changing the settings of the camera

After you placed the camera on the right place it could be possible you want to manage the settings of the camera. Follow the next steps on the webpage of your e-Centre:

- Go to 'Cameras'.
- Click on the edit-icon next to the camera.
- You can change the description and the location at the tab 'Basic'
- You can login to the webpage of your camera to change the advanced setting by clicking on 'Network'
- If you want to change the settings you can click on 'Open'
- After you clicked on 'Advanced' you can login to change the visibility of the camera. Type in your username and password and click 'Connect'. The standard username and password is 'admin'.
- If you're connected to the camera you can change the view of the camera. You can flip or mirror the camera image. Also you can set the right brightness and contrast at this page.
- When finished click 'Save'.
