DESCRIPTION

Professional domotica available for everybody.

Eminent's e-Domotica system combines an intelligent way to secure your house, creating a comfortable home to live in and provides an insight in your electricity consumption. A Smart Home!

e-Domotica from Eminent: Easy and affordable

If you are on the road, do you think about your house? Do you want to know if you turned off your coffee machine? Or if you are away do you want to check what is going on at home? Would it not be comfortable to check your house? Just by using your tablet or smart phone, wherever you are, when ever you want.

And if you are coming home, is it not practical if the lights are switched on automatically? Or to dim the lights when turning on your TV?

This is all possible using domotica. And using Eminent e-Domotica, it is very affordable and easier than you think.

e-Domotica offers you:

- Alarm system with alarm reports by phone, texts or email;
- Viewing live surveillance images from anywhere in the world;
- Dim and switch one or more lights and/or devices;
- Reduction of your electricity consumption

Get started directly using the e-Domotica starter kit

Until now domotica was only available for tech guys connecting several systems to each other. Or installed by an installer, costing close to a new car.

For an affordable price you can get started with e-Domotica:

- Installation is easy with using your own computer or tablet;
- Using your existing wireless network;
- It is easy to extend with extra or other accessories, thanks to the wireless international Z-wave standard;
- Smart cooperation: (sample) if an alarm goes off, the lights can be switched on automatically.

Dutch quality, European support

The heart of the e-Domotica system is a Dutch product. The software and hardware are developed and manufactured in The Netherlands.

The software and support is available in common European languages.

This means quality. We are convinced about this. That is why you have **5 year warranty** on the entire starter kit.

e-Domotica and safety

Is e-Domotica safe? Can others control your lights or your alarm system? Or view the camera images?

Of course you want to know how safe the e-Domotica system is.

Eminent's e-Domotica is using a highly secured internet connection between the e-Domotica Portal and your e-Domotica system at home.

The level of this security is comparable with internet banking security.

What is inside the starter kit?

The starter kit contains all devices needed to make your house safe and intelligent:

- Touchscreen e-Centre including software;
- 2 switches to turn on/off lights and devices (EM6520);
- Wireless rotating IP surveillance camera (EM6561);
- Motion sensor (EM6581);
- Smoke sensor (EM6590).

For an affordable price

Including 3 months free alarm service :

- Max. 10 alarm reports by phone or SMS;
- Advanced support;
- Storage and view back camera images after alarm report.
